23. Problem: (use additional Sheets if necessary)

Sun issues new Solaris 8 patches on a regular basis to fix bugs and improve overall system performance. These patches are required to be deployed to the sites periodically.
The documentation has been changed to modify the installation instructions to use and deliver the Solaris 8 maintenance CDs.
Note: This CCR replaces CCR 04-0490 and 04-0490A.

24. Proposed Solution: (use additional sheets if necessary)
Install the Solaris 8 maintenance release 02/04 and the latest Solaris 8 Recommended & Security and J2SE patch bundles on hosts as outlined in the PSR document 914-TDA-289 Rev 02 (attached).
This requires that you configure and use a Jump Start Server as outlined in the PSR document.

Repost the document and deliver the Solaris 8 Maintenance CDs to the DAACs.

25. Alternate Solution: (use additional sheets if necessary)

None

26. Consequences if Change(s) are not approved: (use additional sheets if necessary)

EMD is required to deploy patch upgrades on a regular basis
